

In order to accomplish its charge, FLHSA has hired a nationally recognized consulting firm with multidisciplinary expertise in health care and related businesses on behalf of the 2020 Commission. Stroudwater Associates ([www.stroudwater.biz](http://www.stroudwater.biz)), based in Portland, Maine, will guide the study's progress. The Stroudwater team, led by Chairman and CEO Marc Voyvodich, seeks to assimilate the community's many perspectives on the region's future health and health care needs. These data will inform the 2020 Commission's work and highlight important issues to be considered in the analysis.

A nationally recognized health care facilities planning firm, ConfigureHealth ([www.configurehealth.com](http://www.configurehealth.com)), based in Philadelphia, has been commissioned to develop a high-level inventory and evaluation of existing facilities, and to catalogue and quantify capital needs for future renovation, modernization, and replacement. The intent of this process is to present the depth and breadth of the community's health services capital needs to the 2020 Commission.
